Imagine a career where your voice open doors

Your words lead teams, and your confidence sets you apart. Business Communication empowers you to shine in interviews, ace client calls, and lead with clarity. In a world full of tech, those who speak well stand out. Ready to power up your communication skills?

Syllabus Breakdown

Speak clearly and confidently in AI, Data & Tech roles. Build strong, global-ready communication skills.

Neutral Accent

Reduce native accent, sound clear and professional.

Pronunciation Fixes

Master tricky tech words with simple drills.

Natural Fluency

Use stress, tone, and linking to sound smooth.

Accent Listening

Understand American, British & Indian accents.

Confidence Building

Speak clearly under pressure and in interviews.

Workplace English

Handle intros, meetings & client calls.

Tech Presentations

Explain projects and insights with impact.

Certification

Final speaking task + feedback to earn your certificate.

Phase 1: Foundation of Accent Neutralization and Pronunciation (Days 1–7)

Foundation of Accent Neutralization and Pronunciation

Lay the groundwork for clear, professional communication through pronunciation basics and self-awareness.

Unit 1: Introduction to Accent Neutralization

Learn the importance of clear communication in professional settings. Explore basic phonetics and neutral accent principles. Self-assess your current speech patterns.

Unit 2: Vowel and Consonant Sounds Mastery

Master vowel and consonant pronunciation. Identify and correct common speech issues. Practice with minimal pairs and phonetic exercises.

Unit 3: Stress, Intonation, and Word Linking

Learn stress patterns in words and sentences. Practice basic intonation for fluency. Work on linking words and using reductions.

Unit 4: Listening and Self-Assessment

Identify native accents and speech patterns. Track progress using self-assessment tools. Mimic native speakers to improve pronunciation.

Phase 2: Refining Pronunciation and Fluency (Days 8–15)

Refining Pronunciation and Fluency

Advance your speech clarity & fluency by refining articulation & tackling technical speech patterns.

Unit 5: Advanced Vowel and Consonant Refinement

Focus on difficult vowel and consonant sounds. Improve clarity and pronunciation of complex words. Practice with technical terms and difficult words.

Unit 6: Word Stress and Sentence Intonation

Understand word stress, especially for technical terms. Adjust sentence intonation for better clarity. Practice with industry-specific terminology.

Unit 7: Connected Speech and Fluidity

Master connected speech and blending sounds. Reduce mother tongue influence for better fluency. Shadow native speakers to improve flow.

Unit 8: Reviewing and Refining Pronunciation

Review progress and focus on weak areas. Work on refining pronunciation through targeted exercises.

Phase 3: Advanced Communication Techniques (Days 16–23)

Advanced Communication Techniques

Move beyond pronunciation into workplace communication, confidence building, and expression.

Unit 9: Enhancing Fluency and Rhythm

Improve rhythm and flow in speech. Avoid sounding robotic and focus on natural fluency. Practice with a paragraph, emphasizing rhythm and speed.

Unit 10: Shadowing and Reducing MTI

Reduce mother tongue influence in spontaneous speech. Shadow native speakers for better speech flow. Record responses after shadowing for feedback.

Unit 11: Professional Communication in the Workplace

Learn effective communication techniques for business. Practice role-plays for introductions, meetings, and technical discussions. Record a mock business introduction.

Unit 12: Emotional Expression and Confidence

Use intonation to convey emotions and confidence. Speak with authority while remaining clear. Practice delivering confident, emotionally varied speeches.

Phase 4: Final Refinement and Evaluation (Days 24–30)

Final Refinement and Evaluation

Apply everything through mock scenarios, presentations, and real-time speaking exercises.

Unit 13: Accent Reduction and Neutralization Techniques

Focus on accent reduction, especially American, British, and Indian accents. Compare your neutral speech with regional accents. Record and compare your speech in different accents.

Unit 14: Mock Presentations and Data-Related Communication

Prepare technical presentations with clear communication. Focus on articulation, clarity, and engaging presentation. Record a 5-minute presentation on a data-related topic.

Unit 15: Rapid Listening and Response

Practice speed listening and quick responses. Improve understanding of fast speech and voice projection. Record responses to rapid dialogues.

Unit 16: Final Assessment and Graduation

Review all modules and assess your progress. Identify areas to refine further. Complete a final assessment and simulated business scenario.

Sample Projects

The Deloitte logo, consisting of the word "Deloitte" in a bold, sans-serif font with a small green dot at the end of the word, is positioned to the right of the project title.

Deloitte.

Google Analytics for Financial Institute

Tracks web traffic, search data, user behavior, and social media engagement insights.

Healthcare Predictive Analytics

A hospital used analytics to predict patient complications, enhancing care and reducing readmissions.

Customer Segmentation for Retail

A retail company used analytics to identify customer segments, enabling personalized marketing and boosting sales.

Supply Chain Optimization for E-commerce

An e-commerce company optimized inventory and delivery through data analytics, improving customer experience.
